Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Following the entry of the amendment filed 11/28/2003, the claims 1, 3 and 5-26 are pending.

1. Rejections and/or objected from the previous office action are hereby withdrawn. The following rejections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

NEW GROUND OF REJECTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3, and 5-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Based upon the language in claim 1 “generating a plurality of vector molecules from said plurality of host cells, each vector molecule of the plurality comprising a different library element encoding region and each vector comprising only one library element encoding region”, moreover, in claims 3, the language “introducing one or more of nucleic acid insert molecules from said plurality of nucleic acid insert molecules into each host cell of the plurality of host cells”, further, in claim 26, the language “introducing one or more of the nucleic acid insert molecules into each host cell of said plurality of host cell under conditions which allow for recombination and gap repair to occur”

Art Unit: 1637

and "each host cell of the plurality comprises a vector molecule that comprises (a) a different nucleic acid insert molecule library element encoding region, and (b) only one library element encoding region", it is unclear how one skilled in the art would be able to determine whether or not each vector only has one single insertion in the host cell and the single insertion in each vector is different from each other. Therefore, one skilled in the art is unable to make or use the invention.

Summary

3. No claims are allowable.

5. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is (703) 305-7112. The examiner can normally be reached on Monday-Friday from 8:00 AM-4:30 PM.
